QC release (ELISA-based blocking/boosting activity use test): Passed

NOTE: This product is for *in vitro* research or further IVD manufacturing use only.

Ready-to-use **IgG free** reagent applicable for blocking ELISA plates/membranes, diluting complex specimens and diverse detection reagents/conjugates. Particularly recommended for use in the capacity of diluent/blocker with tracer/detector IgG-biotin conjugates. Effectively eliminates NSB in ELISA, blotting, ICT and IHC applications. This product is NOT recommended for diluting Streptavidin conjugates as it contains endogenous biotin.
